

George Mavrothalassitis got his BSc in Chemistry from the University of Thessaloniki and his PhD in Biochemistry from the same Department. He did his post graduate studies in molecular biology at the Institute of Molecular Biology and Biotechnology (IMBB), Foundation for Research & Technology Hellas (FORTH) and then he worked for 8 years as a Fellow, Associate και Scientist at the National Cancer Institute of the National Institutes of Health (NCI/NIH) in the USA. Since 1997 he is faculty at the Medical School, University of Crete and Associate Researcher at IMBB, FORTH. He is focusing on *ETS* genes, their role in growth, differentiation, development and genetic diseases and their contribution in Cancer. He has a long tenure as Chair of graduate programs and currently is charing the Graduate Programs Committee of the Medical School at the University of Crete.

Professor of Medical Chemistry, Medical School, University of Crete, and Collaborating Research Scientist, Institute of Molecular Biology and Biotechnology, Foundation for Research & Technology Hellas.
